

PRODUCT DATA SHEET

NASICON Powder

Feature:

NASICON powders can be produced for customer's special need/specifications.

Typical Product Applications:

- Battery and other electrochemical device
- Electrochemical sensor elements

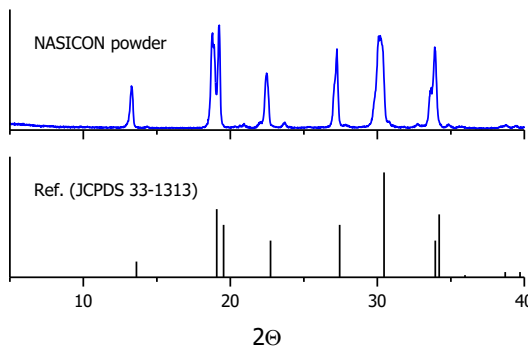

List of Products

Item No.	Composition	Crystallite size	Particle size (agglomerate)
N3C	$\text{Na}_3\text{Zr}_2\text{Si}_2\text{PO}_{12}$	< μm (crystallite)	20-45 μm (agglomerate) 45-75 μm (agglomerate) > 75 μm (agglomerate)
N3SD (Spray dried)	$\text{Na}_3\text{Zr}_2\text{Si}_2\text{PO}_{12}$	< μm (crystallite)	5-20 μm (agglomerate) 20-45 μm (agglomerate) 45-75 μm (agglomerate) > 75 μm (agglomerate)

Powders are also available in further densified forms of the same particle sizes.
